Overview of Gauze Swabs

Our range of supply includes the following variants:

- FES-TUPF®- triangular hat-style form based on the FESMED technology;
- Ball-shaped gauze swabs, cut edges held inside tightly by way of a rubber ring;
- Ball-shaped gauze swabs, without a rubber ring

Description and application:

- 100% cotton, aseptic gauze, DIN EN 14079, Ph. Eur., type 20;
- to halt bleeding and for surgical cleaning, as well as for large-area skin disinfection.

Packaging:

- Non-sterile: Packed in pressure seal bags;
- Sterile: Sealed in special-paper bags with sterilisation indicator, packed in a collapsible box

Sizes:

The various size designations found on the market are compared below to facilitate orientation. The number of the FESMED designation is used as the reference size.
